

**Typical view of the installed FFAIS.**

**FFAIS filters outside air before it enters your home.**

**Choose a good place for fresh air intake and remove foundation vent.**

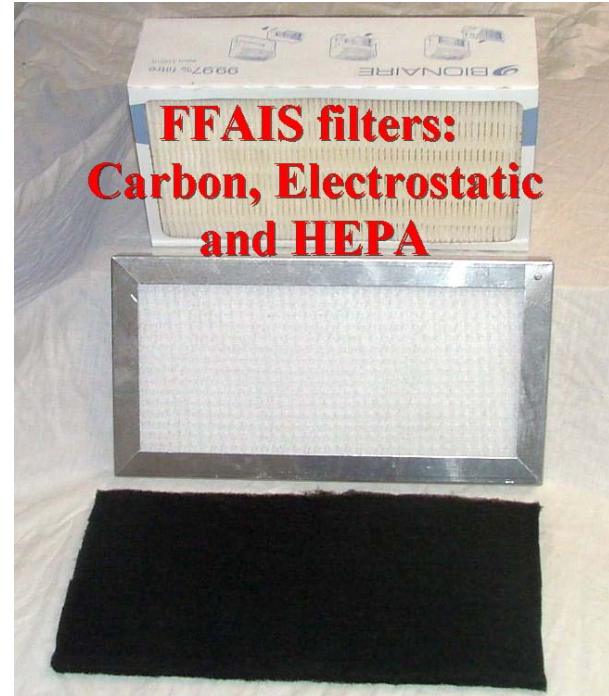

**Fresh air intake system fits in crawlspace foundation vent and is ducted to return side of air handler.**

**Install the FFAIS into the foundation vent.**

**FFAIS filters:  
Carbon, Electrostatic  
and HEPA**

**Using expanding foam seal in the FFAIS and install the insulation jacket, and back flow damper.**

**Connect an air duct to the FFAIS and the return side of the central air system.**

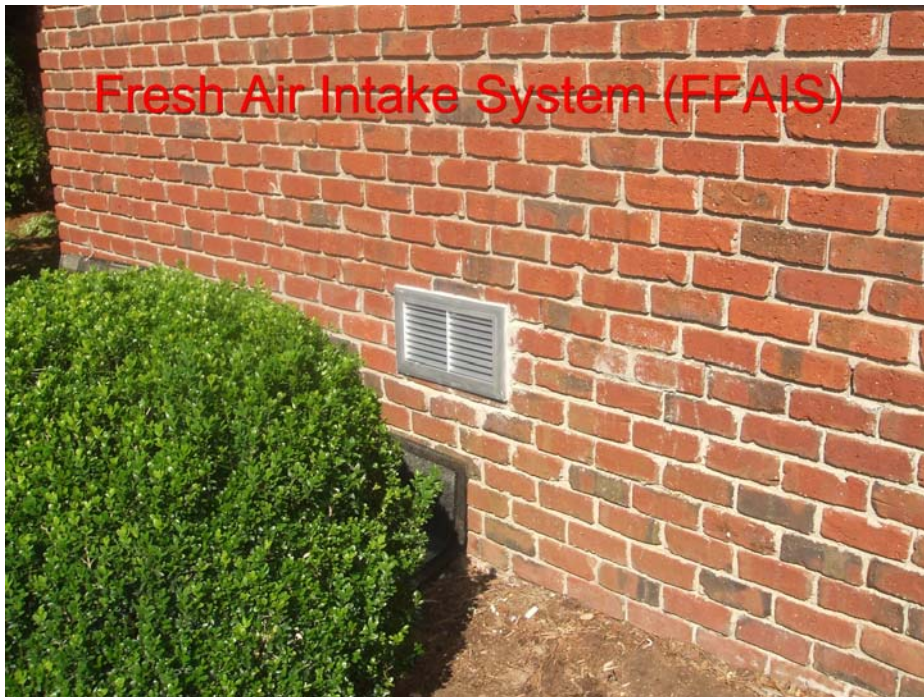

**Support the FFAIS air duct as needed,  
turn on the central air and your now  
suppling filtered fresh air to the  
building.**

**Fresh Air Intake System**

**Fresh Air Intake System (FFAIS)**

**Below grade installation of the  
FFAIS.**
